ANALYZE DATA IN A MODEL CAR DATABASE WITH MYSQL WORKBENCH

Project scenario:

Mint Classics Company, a retailer of classic model cars and other vehicles, is looking at closing one of their storage facilities.

To support a data-based business decision, they are looking for suggestions and recommendations for reorganizing or reducing inventory, while still maintaining timely service to their customers. For example, they would like to be able to ship a product to a customer within 24 hours of the order being placed.

Skills demonstrated:

- Imported an existing database using MySQL Workbench.
- Familiarized with a business and its data by reviewing a relational model diagram and exploring tables of data in MySQL Workbench.
- Analyzed inventory data using SQL queries in MySQL Workbench that retrieve data from a multiple-table relational database using SQL commands such as: select, order by, where, group by, and having.
- Developed recommendations and suggestions for solving a business need/problem based on data analysis.
- Recommendations and suggestions for inventory reduction in the form of scripted queries.

Tools used:

MySQL Workbench, SQL queries, Mint classics database file.

Conclusion:

- We can reduce the products whose estimated prices are low .
- We can reduce the productline train which has the lowest sales from 2003-2005.
- Trains product line has the minimum number of products which is 3.
- In my opinion, there is no need to close warehouse.

Solution:

Q1. Which countries are the customers of Mint classics located in ?

```
select  distinct country from customers;
```

List of countries where customers are located(27 in total).

	country
▶	France
	USA
	Australia
	Norway
	Poland
	Germany
	Spain
	Sweden
	Denmark
	Singapore
	Portugal
	Japan
	Finland
	UK
	Ireland
	Canada
	Hong Kong
	Italy

Q2. Which country has the highest number of orders between 2003 and 2005?

```
select country, count(country) as countC
from orders o
join customers c
on o.customerNumber = c.customerNumber
group by country
order by countC desc;
```

The USA topped the list with 112 orders from 2003 to 2005.

	country	countC
▶	USA	112
	France	37
	Spain	36
	Australia	19
	New Zealand	15
	UK	13
	Italy	10
	Norway	9
	Singapore	9
	Finland	9
	Germany	7
	Sweden	7
	Denmark	7
	Canada	7
	Belgium	7
	Austria	7
	Japan	6
	Philippines	3
	Ireland	2
	Hong Kong	2

Q3. What is the hierarchy of the company's employees and how can an organizational chart be generated?

```
select e.employeeNumber,
concat(e.firstName,' ',e.lastName) as Employee_Name,
concat(s.firstName,' ',s.lastName) as Supervisor_Name
from employees e
join employees s
on e.reportsTo = s.employeeNumber;
```

	employeeNumber	Employee_Name	Supervisor_Name
▶	1056	Mary Patterson	Diane Murphy
	1076	Jeff Firrelli	Diane Murphy
	1088	William Patterson	Mary Patterson
	1102	Gerard Bondur	Mary Patterson
	1143	Anthony Bow	Mary Patterson
	1165	Leslie Jennings	Anthony Bow
	1166	Leslie Thompson	Anthony Bow
	1188	Julie Firrelli	Anthony Bow
	1216	Steve Patterson	Anthony Bow
	1286	Foon Yue Tseng	Anthony Bow
	1323	George Vanauf	Anthony Bow
	1337	Loui Bondur	Gerard Bondur
	1370	Gerard Hernandez	Gerard Bondur
	1401	Pamela Castillo	Gerard Bondur
	1501	Larry Bott	Gerard Bondur
	1504	Barry Jones	Gerard Bondur

Q4. What countries are the company branches situated in and which employee(s) work there?

```
select e.employeeNumber, e.firstName, e.lastName, e.jobTitle,
o.city,o.addressLine1 as address, o.state, o.country
from employees e
join offices o
on e.officeCode = o.officeCode
order by employeeNumber;
```

employeeNumber	firstName	lastName	jobTitle	city	address	state	country
1002	Diane	Murphy	President	San Francisco	100 Market Street	CA	USA

	10103	121	2003-02-02	Shipped
	10158	121	2003-10-15	Shipped

List of orders shipped from 2003 to 2005.

Q6: What is the total number of products/orders that have been shipped from 2003–2005?

```
select count(status) as totalShipped

from orders

where status = "Shipped";
```

	totalShipped
▶	303

Total number of shipped products from 2003 to 2005.

Q7: Taking the orders of customers into context, what product(s) did they actually request for?

```
select od.productCode, od.orderNumber,

o.orderDate, od.quantityOrdered,

od.priceEach, p.productName, p.productLine

from orderdetails od

join products p
```

```
using(productCode)
join orders o
using(orderNumber)
order by orderNumber;
```

productCode	orderNumber	orderDate	quantityOrdered	priceEach	productName	productLine
